

Dnyanesh Mulay

AI Product Engineer | LLM-Powered Mobile & Web Applications

9307967442 ◇ dnyanesh2442@gmail.com ◇ Pune, Maharashtra ◇ [My Portfolio](#) ◇ [LinkedIn](#) ◇ [GitHub](#)

SUMMARY

Application developer with experience building **AI powered mobile and web applications** using **React and React Native**. Strong in integrating **LLM based workflows** with **backend services**, including **APIs, authentication, and cloud databases**. Comfortable **deploying containerized services using Docker** and working with **modern, scalable application architectures**.

WORK EXPERIENCE

SWE Intern

Oct '25 — Dec '25

Hungy Inc.

New Brunswick, Canada (Remote)

- Built **server driven, event based push notification workflows** for **iOS and Android**, delivering **client facing notifications** triggered by backend events independent of connectivity.
- Implemented **offline first data handling** with **local persistence and background synchronization**, ensuring consistent **client data sync** after network recovery.
- Deployed **Docker based API and data processing microservices** and built **n8n automation pipelines**, including an **AI driven agent** backed by **PostgreSQL** for **SQL less and minimal query data access**.

PROJECTS

ReportIT (Mobile) [Link](#)

- Built an **offline first grievance reporting system** enabling users to create and queue reports locally, with background synchronization to the server after connectivity recovery.
- Implemented **separate user and admin workflows**, allowing users to track report status while admins handled verification, prioritization, escalation, and resolution through structured dashboards.
- Designed **event driven backend pipelines** to manage report state transitions, audit trails, and notifications, ensuring consistent data delivery across client and admin interfaces.

Medicine Tracker(Mobile) [Link](#)

- Developed a cross-platform mobile app that enables users to schedule medicine reminders using **Expo Notifications** and **time-based alerts**.
- Integrated **Firebase Firestore** for secure, real-time storage of user medicine data and schedules.
- Implemented **Firebase Authentication** for user sign-up and login, ensuring personalized and secure access to data.

Kisan AI(Web) [Link](#)

- Built a **responsive React.js web interface** to support farmers with AI-based crop disease analysis, fertilizer tracking, and agri-market updates.
- Implemented intuitive **image upload flow** for crop health diagnostics and showcased disease results with proposed solutions
- Integrated a **chatbot** for answering common farmer queries and guiding them through app features.

Pathfinder(Web) [Link](#)

- Developed a responsive, user-friendly **web UI in React.js**, designed to help students explore career paths through interactive layouts and smooth **scroll-based animations**.
- Built **AI-powered chatbots** using OpenAI's API to provide personalized guidance, answer career queries, and simulate mentor-like interactions.
- Focused on crafting a **modern UX** with features like smart search, section-based navigation, and minimal, elegant visual components.

SKILLS

Web Typescript, ReactJS, TailwindCSS, GSAP Animation, ScrollTrigger, Vite, Gen AI

Mobile TypeScript, React Native, Expo, State Management

Backend MongoDB, Axios, Postman, API Management, prisma, BaaS, JWT

Tools Git, Vercel, (Deployment), Expo CLI, Version Control, Cursor, AI tools, n8n, Docker, LangChain

Interests Hackathons, Project Management, Collaboration, Networking

AWARDS

Winner

Rackathon 2025

Mar '25

Hackbyte 2.0 - Social Media Track Prize winner IIIT Jabalpur	Apr '24
Codelite - Top 5 Pune University	Oct '24

VOLUNTEERING

Competition Team Co-head, AICC	Jun '25 — Present
---------------------------------------	-------------------

EDUCATION

B.Tech in CSE , Pune University (GPA: 8.7)	Jul '23 — Present
10+2 in Science , HSC Board Pune (GPA: 90%)	Jun '22 — Feb '23

CERTIFICATIONS

The Complete 2024 Web Development Bootcamp , Udemy
